

Mr. Powell: I am requesting the delay of the new FCC ruling to allow for real public debate on this important issue. The federal government as established in the Constitution is meant for "We the People", not the rich media monopolies and corporations. Allowing more corporations to gobble up smaller media will only ensure more censorship of news and opinion in this country which is already experiencing more censorship than other democratic countries in the world. We don't need the U.S. to go the way of Nazi Germany with only elites and government deciding what we can hear, know or see. Even though you do not believe the public has a right to lobby on this issue, you are paid by the taxes of "We the People" and our voice is more important than the corporations who pay for your trips.
